Databases & Caching: PostgreSQL, Redis, MongoDB, SQLAlchemy, Alembic

WORK EXPERIENCE

Senior Software Engineer — CloudScale Technologies | San Francisco, CA (2022 - Present)

- Architected and deployed 15+ RESTful microservices using FastAPI and PostgreSQL, handling over 2.5 million daily requests.
- Reduced median API latency by 38% and P99 latency by 52% through Redis distributed caching and database query optimization.
- Led cloud migration from legacy EC2 instances to containerized AWS ECS clusters with automated zero-downtime CI/CD pipelines.
- Mentored 4 junior engineers in test-driven development, code reviews, and API contract design using OpenAPI schemas.

Software Engineer — Nexa Solutions | Austin, TX (2020 - 2022)

- Built responsive, accessible customer portals using React, TypeScript, and Tailwind CSS serving 45,000+ monthly active users.
- Integrated third-party payment gateways (Stripe, PayPal) and webhooks with 99.98% processing reliability.
- Engineered comprehensive automated unit and integration test suites using PyTest and Jest, boosting test coverage from 60% to 92%.
